

Table 1. DM Variables

Variable Name	Variable Label	Definition
STUDYID	Study Identifier	A sequence of characters used to uniquely identify the study
DOMAIN	Domain Abbreviation	An abbreviation for a collection of observations, with a topic-specific commonality
USUBJID	Unique Subject Identifier	A sequence of characters used to uniquely identify a subject across all studies for all applications or submissions involving the product
SUBJID	Subject Identifier for the Study	Subject identifier, which must be unique within the study
SITEID	Study Site Identifier	A sequence of characters used to uniquely identify the facility associated with study-specific activities
AGE	Age	A numeric representation of the elapsed time since birth at a specific point in time defined for the trial
AGEU	Age Units	The unit of time used to express the age
SEX	Sex	Sex of the subject
RACE	Race	Race of the subject
ETHNIC	Ethnicity	The ethnicity of the subject
ARMCD	Planned Arm Code	A short sequence of characters that represents the planned arm to which the subject was assigned
ARM	Description of Planned Arm	The name of the planned arm to which the subject was assigned
ACTARMCD	Actual Arm Code	A short sequence of characters that represents the arm in which the subject actually participated
COUNTRY	Country	The country in which the investigational site is located
DMDTC	Date/Time of Collection	The date or date and time of demographic data collection

Table 2. VS Variables

Variable Name	Variable Label	Definition
STUDYID	Study Identifier	A sequence of characters used to uniquely identify the study
DOMAIN	Domain Abbreviation	An abbreviation for a collection of observations, with a topic-specific commonality
USUBJID	Unique Subject Identifier	A sequence of characters used to uniquely identify a subject across all studies for all

		applications or submissions involving the product
VSSEQ	Sequence Number	A number used in combination with the identifier of the subject of the observation to uniquely identify a record within a dataset
VSTESTCD	Short Name of Measurement, Test, or Examination	The standardized short sequence of characters used to represent the measurement, test, or examination
VSTEST	Name of Measurement, Test, or Examination	The standardized name of the measurement, test, or examination
VSPOS	Position of Subject During Observation	The particular way that a subject's body is placed or situated during an assessment
VSORRES	Result or Finding in Original Units	The result of the measurement, test, or examination, as originally received or collected
VSORRESU	Original Units	The unit of measure for the result (as originally received or collected) of the measurement, test, or examination
VSSTAT	Completion Status	Used to indicate when a question about the occurrence of a prespecified event was not answered. Should be NA or have a value of "NOT DONE"
VSBLFL	Baseline Flag	An indication that the record is the baseline assessment
VISITNUM	Visit Number	An assigned numeric identifier that aligns to the chronological order of a clinical encounter
VISIT	Visit Name	The label for a protocol-defined clinical encounter
VSDTC	Date/Time of Collection	The date or date and time of the assessment or the specimen or data collection from the subject, represented in a standardized character format

Table 3. LB Variables

Variable Name	Variable Label	Definition
STUDYID	Study Identifier	A sequence of characters used to uniquely identify the study
DOMAIN	Domain Abbreviation	An abbreviation for a collection of observations, with a topic-specific commonality
USUBJID	Unique Subject Identifier	A sequence of characters used to uniquely identify a subject across all studies for all

		applications or submissions involving the product
LBSEQ	Sequence Number	A number used in combination with the identifier of the subject of the observation to uniquely identify a record within a dataset
LBTESTCD	Short Name of Measurement, Test, or Examination	The standardized short sequence of characters used to represent the measurement, test, or examination
LBTEST	Name of Measurement, Test, or Examination	The standardized name of the measurement, test, or examination
LBCAT	Category	A grouping or classification of the topic of the finding, event, or intervention
LBORRES	Result or Finding in Original Units	The result of the measurement, test, or examination, as originally received or collected
LBORRESU	Original Units	The unit of measure for the result (as originally received or collected) of the measurement, test, or examination
LBORNRLLO	Normal Range Lower Limit-Original Units	The lowest value in a normal or reference range for the result (as originally received or collected) of the measurement, test, or examination
LBORNRLHI	Normal Range Upper Limit-Original Units	The highest value in a normal or reference range for the result (as originally received or collected) of the measurement, test, or examination
LBNRIND	Normal/Reference Range Indicator	A classification of the original or standardized result as it relates to a normal or reference result range
LBSTAT	Completion Status	Used to indicate when a question about the occurrence of a prespecified event was not answered. Should be NA or have a value of "NOT DONE"
LBBLFL	Baseline Flag	An indication that the record is the baseline assessment
VISITNUM	Visit Number	An assigned numeric identifier that aligns to the chronological order of a clinical encounter
VISIT	Visit Name	The label for a protocol-defined clinical encounter
LBDTC	Date/Time of Collection	The date or date and time of the assessment or the specimen or data collection from the subject, represented in a standardized character format
